(a) timing reacts early
timing ratio, distorted / clean
all classes distorted
only deer distorted
1.8
1.6
1.4
1.2
1.0
0.8
0.6
10^{-2}
10^{-1}
10^{0}
size of planted error (nats per class)
(b) lopsidedness reacts late
agreement of h with clean data
1.0
0.9
0.8
0.7
0.6
all classes distorted
only deer distorted
10^{-2}
10^{-1}
10^{0}
size of planted error (nats per class)
